

Refresh

Drain Control Program

Eliminates Drain Odors and Restores Slow-Flowing Drains
in Commercial & Industrial Floor Drains

Refresh Drain Control Program uses one-way valves and once a month treatment with Refresh Drain Fluid to keep drains fresh & clean

- 2-step system combines one-way drain valves with eco-friendly Refresh Drain Fluid
- Drains are treated once a month with Refresh to keep drains clean
- Reduces overall maintenance cost
- Restores slow flowing drains
- Eliminates odors and blocks insects like fruit flies from entering drains
- Contains NO dangerous acid or alkali ingredients
- Valves come in multiple sizes and do not alter appearance or performance of the drain
- Contains Odor Off Odor Neutralizer to keep eliminate odors at molecular level
- Safe for plumbing and septic systems
- Excellent for restrooms
- Prevents smelly or hazardous gases coming from drain
