Duration: 1 cartridge lasts 30 days

HOW IT WORKS

WiseAir features a contoured face with 16 openings that extend 180 degrees across the dispenser and 16 openings on top. This allows the active fan and natural airflow to circulate fragrance across the entire room.

The fragrance is held 3 ultra-absorbent fibers that each hold 7 times their weight in fragrance oils. The environmentally-friendly fibers absorb the fragrance oil, eliminating risk of spillage, waste, or quick evaporation to ensure 30 days of consistent fragrance.

WiseAir Select disperses fragrance safely and naturally. The “wind-inspired” WiseAir delivers a sustainable air freshening solution for professional environments.
